

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. Claims 1-7 were previously cancelled. Please amend claims 8-14 as follows:

Listing of Claims

Claims 1-7 (Cancelled)

8. (Currently Amended) A method of identifying and registering persons based on ~~existing identification codes~~ data, in particular for ~~Internet~~ applications, comprising the processing steps of:

- a) defining a URL/domain name system in accordance with a defined system of ~~the pre-existing~~ identification ~~codes~~ data stored in at least one database,
- b) formulating URL/domain name notation rules in accordance with the defined system of pre-existing identification ~~codes~~ data, and
- c) designating codes and the associated URLs/domain names on the basis of the defined system of pre-existing identification ~~codes~~ data and in accordance with the formulated URL/domain name notation rules, and implementing at least a part of the URLs/domain names in the ~~Internet~~.

9. (Original) The method as claimed in claim 8, wherein the method also comprises the processing steps of:

- d) registering data of persons,
- e) creating a data carrier on the basis of the registered data, and
- f) linking the data carrier to a specific URL/domain name.

10. (Original) The method as claimed in claim 9, wherein the method further comprises the processing step of:

- g) making specific URLs/domain names accessible to the public.

11. (Original) The method as claimed in claim 9, wherein the method further comprises the processing step of:

- h) providing services by means of a data carrier.

h) providing services by means of a data carrier.

12. (Original) The method as claimed in claim 9, wherein the method further comprises the processing steps of:

- i) incorporating registered data of persons in data files,
- j) incorporating the data files in a search system, and
- k) providing an interface with search options for generating results on request as a response to a query.

13. (Original) The method as claimed in claim 8, wherein the method is applied within specific Top Level Domains and/or Sub Level Domains.

14. (Currently Amended) An assembly of hardware and software for identifying and registering persons based on ~~existing-identification-codes~~ data, in particular for ~~i~~Internet applications, comprising the processing steps of:

- a) defining a URL/domain name system in accordance with a defined system of ~~the pre-existing~~ identification ~~codes~~ data stored in at least one database,
- b) formulating URL/domain name notation rules in accordance with the defined system of pre-existing identification ~~codes~~ data, and
- c) designating codes and the associated URLs/domain names on the basis of the defined system of pre-existing identification ~~codes~~ data and in accordance with the formulated URL/domain name notation rules, and implementing at least a part of the URLs/domain names in the ~~i~~Internet, the assembly comprising:
 - a network of servers for designating and making available the URLs/domain names,
 - at least one database coupled to the network of servers and having registered data of persons of URLs/domain names, and
 - hardware and software for inputting, localizing and presenting the registered data.
